EDGEWORTH EXAMINATION.

Having been requested by Prof. MORGAN, the Principal of "EDGEWORTH SEMINARY," to attend his recent examination, we consider it but an act of justice to this gentleman, as well as the honorable proprietor of the Institution, to make a public statement of the result, as exhibited to a large and respectable audience, composed not only of the citizens of Greensboro, but of gentlemen from different parts of our own and the adjoining States.

Prof. MORGAN has been connected with "EDGEWORTH SEMINARY" only twelve months. He came bringing with him, from some of the most eminent men in our country, a high and commendable reputation of his scholarship and his experience and success in teaching. Our expectations were consequently considerably raised; and yet we feel constrained to acknowledge that they were more than realized, as we saw his different classes pass in review and heard them rigidly examined in their respective studies. The studies were not of that light and unimportant character so frequently pursued in our female schools; calculated merely to strengthen the memory of the pupils, and puff them up with vain and empty notions of their acquirements—but of that severe kind, which discipline the mind and fit it for the investigation of truth in the various departments of human learning.

For example, classes were examined in Latin, Algebra, Geometry, Mental Philosophy, and the Evidences of Christianity. English Grammar had been studied as a science, in which the true principles of sound interpretation were taught and applied to a correct understanding of the mind of the Holy Ghost in that Book of Books, the knowledge of which is alike essential to our well being in this life and eternity. The young ladies read portions of the Bible, divided them into their component sentences, told their nature and logical connection. The manner in which the examination was conducted, was such as to impress on the mind of every intelligent person who witnessed it, the conviction that it was fair, honest and thorough; while at the same time it afforded a fine specimen of Prof. Morgan's profound acquaintance with the various authors which had been studied, and his happy manner of infusing their views and sentiments into the minds of his pupils. The class in Geometry, when called upon to demonstrate a particular theorem, were required to state the data and the previous propositions on which the proof depended, to mention the method of reasoning employed, and to point out the various steps by which the result was reached. The class in Alexander's Evidences of Christianity gave an analysis of the author's views on each subject presented. Every one must at once perceive that an examination thus conducted requires on the part of the teachers and scholars an intimate acquaintance with their several studies, not to be acquired except by constant, and laborious application.

Prof. Morgan is amply sustained by assistants. The principal amongst these, Miss Salisbury, is a thoroughly educated young lady, and gave the highest satisfaction to all present, in the manner in which her classes in French, &c., were examined, as well as in the progress they manifested. Such a school under the auspices of one so fully qualified for his post should be much known. Mr. Morgan has directed all his varied acquirements to the education of our daughters. He pursues his profession with all the energy and enthusiasm of a man actuated by the loftiest and purest motives. He has given himself wholly to it. We regard him as eminently qualified. A gentleman, a scholar and a Christian, he deserves the patronage of all the friends of a sound and thorough education, conducted on Christian principles. And we hope that he will long see himself at the head of one of the largest and most flourishing schools in the southern country.

In conclusion, we add, from a personal acquaintance with Mr. Morgan's Lady, that parents at a distance may rest assured, their daughters, if entrusted to her care, will receive all that personal attention and kind treatment, in health and sickness, the need of which is often so pressing, felt by young ladies removed from their parental roof; and which, when bestowed, are so eminently calculated to promote their happiness, to reform their manners and to elevate their feelings.

JOHN A. GREETER,
In behalf of the Committee of Examination.

Auction and Commission Business. JOHN C. MOORE, AUCTION AND COMMISSION MERCHANT, Raleigh, N. C., has the pleasure of announcing to his friends and acquaintances and the Mercantile World at large, that he has taken the place of an establishment, recently fitted up on Fayetteville street, next door to Doct. Hinton, nearly opposite the Post Office, only a few steps South of the City Hall, and about 100 yards North of the Court House, and immediately on the corner of Market Square, where he will be glad at all times whether day or night, sunshine or rain, to serve his friends and customers to the utmost of his ability, and so good a stand, he has taken for an establishment, and he has now so made and sell on COMMISSION, or AT AUCTION, WHOLESALE or RETAIL, any GOODS, WARES or MERCHANDISE, with which he may from time to time be entrusted by his friends, either of this City, or at a distance.

His native modesty would forbid in this announcement of his readiness to serve the public in his particular calling, of any boast or puff of his eminent not to be extraordinary qualifications as an Auctioneer; but he flatters himself from the experience already attained and the wonderful success which has hitherto attended his efforts, that he cannot fail to give universal satisfaction to all those who may kindly patronize him with their business. Of one thing however he is most bound to be conceded, is a great gift for an Auctioneer;—and if cracking a good joke, or telling a funny tale, will cause goods to sell well, then as he must be successful, call upon Jno. C. Moore; but let no one suppose that he would, as a Cryer, so far violate his conscience as to depart from the truth to save the world.

It is useless for him to filch his terms, since they will be so moderate that no one can object. Raleigh, 29th April, 1846. 599-1f.

He thinks it unnecessary to give references, being so generally known all over North Carolina.
